

McTavish Interchange Project

From February 2010 to Spring 2011, construction of the McTavish Interchange requires the closure of a portion of Canora Road. When leaving the airport during this period, please follow the route shown in green to reach the Patricia Bay Highway (Highway 17), connecting to Victoria to the south and Sidney and ferry services to the north.

First encounter with a roundabout?

Roundabouts give better continuous traffic flow, reduce emissions, and result in fewer and less severe collisions than conventional intersections. Navigation rules are simple:

1. When entering, yield to traffic already in the roundabout
2. Signal when preparing to exit.
